FUSION MINDS

Department Newsletter

Institute's Vision & Mission

Our Vision

To be a new age learning center for holistic development of students into professional engineers, to cater to the changing needs of techno-society.

Our Mission

- Providing new age infrastructural facilities blended with skill-based curriculum and activity based pedagogical approaches to develop competitive engineering professionals to solve real world problems.
- Preparing students for lifelong learning by transforming educational practices.
- Promoting an ethical and moral values by involving students into community services.
- Inculcating an entrepreneurship and managerial skills by strengthening industry institute interaction.

Department's Vision & Mission

Vision

A future-focused academic environment that empowers students through inclusive education, responsible innovation, and a commitment to driving societal progress professional engineers, to cater to the changing needs of techno-society.

Mission

- Innovation & Research: Advancing AI through quality education and research, foster innovation, and prepare ethical, industry-ready professionals to solve real-world challenges.
- Academia-Industry Collaboration: Empowering students with industry-relevant AI skills through industry collaboration
- Ethical Solutions: Developing ethical and transformative AI solutions for the betterment of global society.

...From Student's desk

It is a privilege to share this newsletter representing the enthusiasm and achievements of the students of the Department of Computer Science & Engineering (Artificial Intelligence & Machine Learning). Our department continues to be a dynamic platform where students explore innovation, develop technical skills, and grow through various academic and co-curricular activities.

Throughout this academic period, students have actively participated in workshops, hackathons, seminars, and collaborative projects that have strengthened both technical knowledge and teamwork. These experiences not only enhance learning beyond the classroom but also prepare us to face real-world challenges in the evolving field of AI and technology.

I sincerely thank our respected Head of Department, faculty members, and all students for their constant support and encouragement. Together, we will continue striving for excellence, innovation, and meaningful contributions to society.

Industrial Visit:

"From Theory to Technology: AIML Students Experience Innovation at PHN Technology"

The CSE-AIML department of MIT Academy of Engineering organized an insightful industrial visit to PHN Technology Pvt Ltd under the guidance of Dr. Diptee Ghusse, Head of Department (CSE-AIML).

The visit aimed to provide students with practical exposure to emerging technologies in the fields of Artificial Intelligence, Robotics, and Automation. During the session, students were introduced to innovative robots and drones through live demonstrations that highlighted their real-world industrial applications.

Industry experts explained the underlying technologies, working principles, and the vital role of AI in enhancing the efficiency, precision, and intelligence of robotic and automated systems. Interactive discussions enabled students to connect academic concepts with practical industrial implementations.

The industrial visit proved to be an enriching and inspiring learning experience. Students gained valuable insights into current industry trends, career opportunities, and future advancements in AI-driven robotics and automation. Overall, the initiative broadened their technical perspective and motivated them to explore research and innovation in intelligent systems.

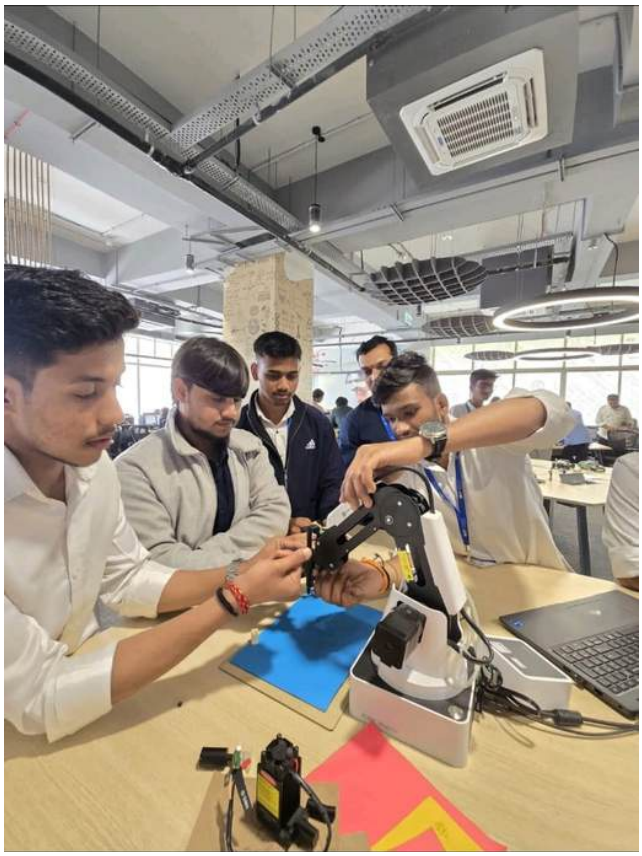

The department extends sincere appreciation to Dr. Diptee Ghusse for her constant encouragement and support in facilitating such industry-oriented learning experiences.

Date : 22th of September 2025
PHN Technology

"INNOVATION IN ACTION – INFOSYS SPRINGBOARD MAKER LAB VISIT"

Students had the opportunity to visit the Infosys Springboard Maker Lab at Symbiosis Institute of Technology on 31 January 2026, where they gained practical exposure to innovation-driven learning and emerging technologies.

The visit provided valuable insights into hands-on innovation, maker-based learning, and real-world problem-solving approaches. Students explored the advanced lab infrastructure and learned how industry-oriented learning environments help bridge the gap between theoretical knowledge and practical applications. The Maker Lab experience highlighted the importance of creativity, collaboration, and technical skills in developing innovative solutions.

The visit encouraged students to think creatively and apply their knowledge to real-life projects and technological developments.

The visit was successfully organized under the guidance and support of faculty members Dr. Khushal Khairnar, Mrs. Deepti Bhirud (Chaudhari), Mrs. Komal Borate, and Mrs. Sonal Singh, whose encouragement made the experience meaningful and informative.

Guest Lecture

"From DSA Fundamentals to Interview Readiness"

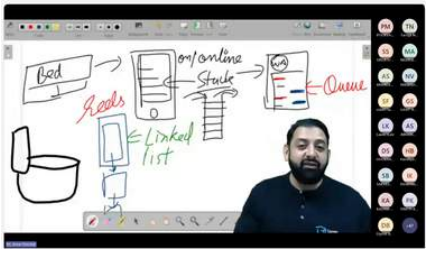

Preparing for coding interviews requires more than simply learning programming concepts. With this focus, an online guest lecture on "DSA Roadmap: From Basics to Placements" was conducted on 23rd August 2025 through MS Teams for Second Year students. The session was led by Dr. Amar Panchal, an eminent educator, technologist, and co-founder of Career Credentials, and witnessed participation from 92 students.

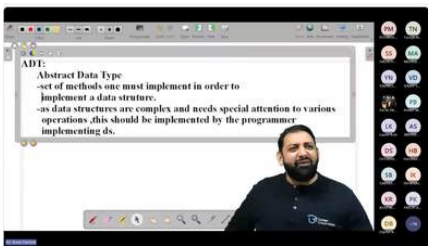

The session offered students a structured approach to learning Data Structures and Algorithms, progressing from fundamentals such as arrays, strings, and recursion to advanced topics including trees, graphs, hashing, and dynamic programming.

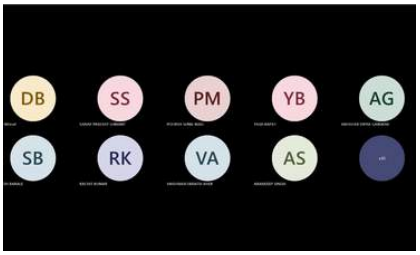

Dr. Panchal also discussed problem-solving techniques, time and space complexity, competitive programming, coding interviews, and placement preparation. The interactive discussion gave students practical insights into coding platforms, problem-solving practices, and interview strategies, helping them gain a clearer direction for their DSA learning and career preparation.

Coordinator: Mrs. Deepti Bhirud
Date: 23rd August 2025

Guest Lecture

"Computing Systems & HPC : Basics and Demo"

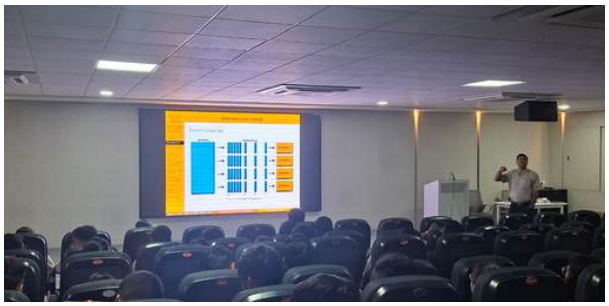

The Department of Computer Science & Engineering (AI & ML) successfully organized a Student Development Program (SDP) titled "Computing Systems & HPC: Basics and Demo" on 5th November 2025 at the CRPC Vishwajyoti Auditorium.

The session was delivered by Dr. Amit Joshi from COEP, who shared valuable insights into the fundamentals of computing systems, parallel computing, OpenMP, HPC workflows, along with engaging live demonstrations. The program was conducted as part of the Operating Systems internal assessment activity, providing students with both theoretical understanding and practical exposure.

The session enabled students to understand the growing importance of High-Performance Computing (HPC) in modern Artificial Intelligence, particularly in areas such as large-scale data processing, model training, and real-time analytics.

The department expresses sincere gratitude to Dr. Amit Joshi, the COEP team, faculty coordinators, and all participants for contributing to the success of the program.

Date : 5th November 2025

Guest Lecture

"Mastering the Art of Feature Engineering: A Guest Lecture for AIML Students"

The AIML department of MIT Academy of Engineering organized an insightful guest lecture on Feature Engineering under the guidance of Dr. Diptee Ghusse, Head of Department (CSE-AIML), and in coordination with Prof. Anita Shinghade.

The session was delivered by Yogesh Murumkar Sir, who highlighted the critical role of feature engineering in building accurate and efficient machine learning models. The lecture covered essential techniques such as feature selection, transformation, encoding, and scaling, emphasizing how properly engineered features significantly enhance model performance.

Through practical examples and real-world applications, students gained a deeper understanding of data preprocessing and its importance in the overall machine learning pipeline. The session was interactive and engaging, allowing students to clarify doubts and connect theoretical concepts with practical implementation.

Overall, the guest lecture proved to be an enriching academic experience, strengthening students' knowledge in AI and data science while inspiring them to apply advanced feature engineering techniques in their projects.

Date : 11th November 2025

Guest Lecture

"Building IoT Expertise Through Industry-Aligned Learning"

The Department of Computer Science & Engineering (AI & ML) conducted a Value Added Course on "IoT Architectural Engineering" through the Learn & Connect platform from 18th to 29th December 2025. The 32-hour online course was organized for 82 students of SY B.Tech CSE (AI & ML), with Mr. Vikrant Verma serving as the resource person.

The course provided students with a comprehensive understanding of IoT fundamentals, layered architectures, device and sensor integration, data acquisition, edge computing, gateways, connectivity protocols, cloud integration, and security principles in Industrial IoT.

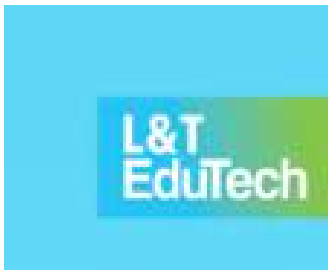

Students also explored Microsoft Azure through a practical approach and learned to design scalable, secure, and efficient end-to-end IoT solutions for real-world applications. The course strengthened students' ability to understand device-to-cloud connectivity, data flow, and IoT system architecture while promoting industry-relevant problem-solving and system integration skills.

Course Coordinator: Mrs. Deepti Bhirud
Date: 18th–29th December 2025

Guest Lecture

"Beyond Tools: AI Literacy and Ethical Responsibility in Modern Engineering"

The Department of Computer Science & Engineering (AI & ML) organized a guest lecture titled "Beyond Tools: AI Literacy and Ethical Responsibility in Modern Engineering" for Second Year CSE (AI & ML) students on 9th February 2026 from 1:00 pm to 3:00 pm.

The session was delivered by Mr. Atul Bengeri, a Digital Transformation, AI & GenAI Expert, Mentor, Coach, Facilitator, and Author. During the lecture, he shared valuable insights into Artificial Intelligence literacy and the ethical responsibilities of engineers in modern technological environments.

The discussion highlighted important topics such as data dependency, model limitations, bias, associated risks, and the role of engineers in designing responsible AI systems. Real-world examples and practical scenarios helped students understand the ethical implications and responsible application of AI technologies.

The session proved to be highly informative and encouraged students to develop a broader understanding of AI beyond technical tools, focusing on ethical decision-making and responsible innovation in engineering.

Date : 9th February 2026

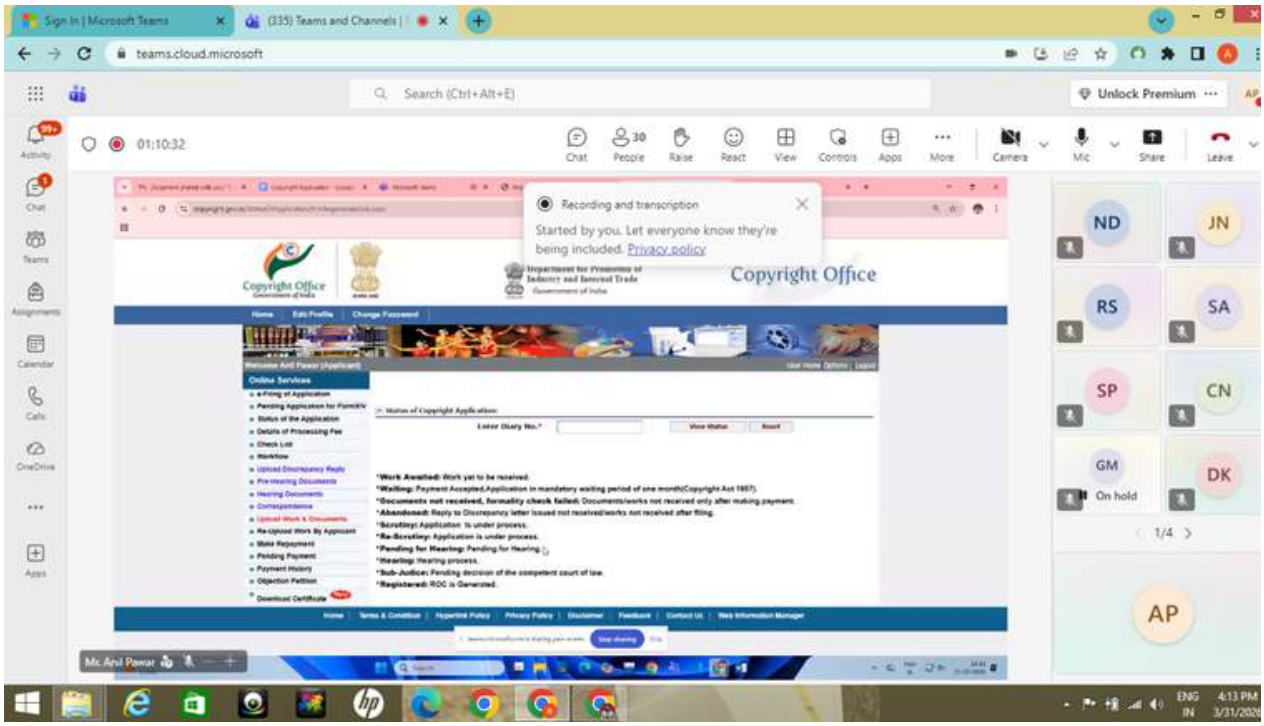

"TURNING ACADEMIC WORK INTO PROTECTED INTELLECTUAL PROPERTY"

Understanding how to protect original academic work is an important part of responsible innovation. With this objective, an online session on Copyright Registration was conducted for Second Year students on 31st March 2026 at MITAOE. The session was attended by 36 participants and was conducted at the department level for students of the CSE (AIML) Department and the institute.

The session introduced students to the concept and importance of copyright, provisions of the Copyright Act, 1957, and the types of academic and creative works eligible for protection. Students were guided through the copyright registration process, including application procedures, required documents such as NOCs and author details, and ways to protect mini projects and reports from unauthorized use. The discussion also highlighted plagiarism, ethical authorship, and intellectual property rights, giving students practical awareness of both the legal and ethical aspects of protecting their work.

Coordinator & Resource Person: Mr. Anil Pawar
Date: 31st March 2026

"BRINGING DATA STRUCTURES TO LIFE THROUGH VIRTUAL LABS"

As part of the Data Structures course, students of SY BTech CSE (AIML) explored the Virtual Lab developed by IIIT Hyderabad as an ICT-enabled learning activity. The initiative was designed to supplement classroom teaching and traditional programming labs with an interactive environment where students could observe and experiment with data structure operations.Through the Virtual Lab, students explored a wide range of concepts including sorting, searching, stacks, queues, linked lists, binary search trees, tree traversals, and graph algorithms such as DFS and BFS. The platform's visual and animated demonstrations allowed students to observe algorithm execution step by step, making it easier to understand the dynamic behaviour of different data structures and the associated time and space requirements.

The activity also provided students with an opportunity to experiment with algorithms without the initial barrier of complete coding, encouraging them to focus on logic and execution. By comparing different approaches through interactive tools, students strengthened their conceptual understanding and developed greater confidence in analysing algorithm behaviour.

The Virtual Lab initiative promoted self-paced, experiential learning, allowing students to explore concepts beyond the pace of regular classroom sessions. It also encouraged students to independently revisit experiments, reflect on their learning, and build a stronger foundation in Data Structures and Algorithms.

Course Coordinator: Mrs. Deepti Bhirud
Date: 4th October 2025

“DIGITAL AWARENESS PROGRAM CONDUCTED UNDER UNNAT BHARAT ABHIYAN”

Under the Unnat Bharat Abhiyan (UBA) initiative, a Digital Suraksha and Smart AI Awareness Program was successfully conducted on 13 January 2026 at
Navin Madhyamik Evam Uchh Madhyamik Vidyalaya Markal. The program aimed to create awareness among students about digital safety and emerging technologies.

The awareness session was organized for 9th-grade students, focusing on the importance of responsible digital behavior in today’s technology-driven world. The initiative helped students understand both the benefits and risks associated with the internet and modern technologies.

As part of the program, an interactive Cyber Security Awareness session was conducted by Meghana Innani and Ruchita Bodke. The session covered topics such as safe and ethical internet usage, identification of cyber threats like phishing and online fraud, and practical methods to stay secure online. Students actively participated and showed great interest in learning how to protect themselves in the digital environment.

The program also included an informative session on Generative Artificial Intelligence, conducted by Ashis Lenka and Sneha Chaurasia.

The session introduced students to the basics of artificial intelligence, explaining how AI systems generate content and highlighting real-life applications and future possibilities of AI technology. The event was conducted under the guidance and support of faculty mentors Ms. Sonam Chauhan and Ms. Anita Devkar-Shingade, whose encouragement contributed significantly to the success of the program.

Date: 13 January 2026
UBA Student Volunteers under the guidence

"ENVIRONMENTAL STUDY'S OUTREACH ACTIVITY"

As part of the Environmental Studies (EVS) assignment, students of the Department of Computer Science & Engineering (AI & ML) conducted outreach activities in nearby schools and institutes to spread awareness about environmental sustainability.

During these sessions, students presented important topics related to environmental protection, sustainable practices, waste management, and conservation of natural resources through informative presentations and interactive discussions and dashboards.

The activity aimed to encourage young students to understand the importance of protecting the environment and adopting eco-friendly habits in their daily lives.

Through this outreach initiative, students not only shared knowledge but also developed communication, teamwork, and social responsibility. The program successfully created awareness among participants and highlighted the importance of environmental sustainability.

Club news :

"ALGOVEDAS: A New Chapter of Technical Excellence Begins"

The AIML department of MIT Academy of Engineering proudly inaugurated its departmental technical club, ALGOVEDAS, under the guidance of Dr. Diptee Ghusse, Head of Department (CSE-AIML), and coordinated by Prof. Deepti Bhirud. This initiative marks an important milestone in creating a collaborative platform for students to strengthen their expertise in algorithms, coding, and emerging AI technologies.

ALGOVEDAS aims to foster innovation, peer learning, and technical excellence through workshops, competitions, coding sessions, and skill-development activities planned throughout the academic year. The club is envisioned as a dynamic space where students can enhance their problem-solving abilities and explore advanced technical concepts beyond the classroom curriculum.

As part of the inauguration, an insightful cybersecurity session was conducted by students from Symbiosis Skills and Professional University. The session covered key aspects of cyber threats, basics of ethical hacking, and the importance of digital security in today's technology-driven world. The interactive talk provided practical awareness and encouraged students to adopt secure coding practices and responsible online behavior.

The inauguration of ALGOVEDAS was both informative and inspiring, setting a strong foundation for future technical initiatives within the AIML department.

With visionary leadership, dedicated coordination, and enthusiastic student participation, ALGOVEDAS is set to emerge as a hub of innovation and technical growth.

Date : 7th November 2025

ALGOVEDAS

Association Activity :

"ASTRA Takes Flight: AIML Department Forms Its Student Association with a Creative Beginning"

The AIML department of MIT Academy of Engineering proudly initiated its official student association, ASTRA, marking a significant step toward fostering leadership, innovation, and collaboration among students. While the formal inauguration is yet to take place, key leadership positions have been appointed to dedicated students, establishing a strong foundation for the association's future activities.

To begin its journey on an engaging and creative note, ASTRA organized a Logo Designing Competition as an icebreaker activity. The initiative aimed to encourage students to actively participate, interact with the newly appointed team members, and contribute to building the association's identity.

The competition invited students to design a unique logo that reflects the vision of ASTRA — symbolizing innovation, intelligence, and technological advancement in the field of Artificial Intelligence and Machine Learning. The event witnessed enthusiastic participation, with students submitting creative and meaningful logo concepts that blended artistic expression with AI-inspired technical symbolism.

Each entry was carefully evaluated based on originality, relevance, and visual appeal. Beyond creativity, the competition strengthened students' sense of belonging and connection with ASTRA, making it a memorable and impactful beginning for the association.

The journey of ASTRA has begun — aiming high, thinking smart, and leading with innovation.

Date : 20th September 2025

ASTRA Student Association Team

Winners of the logo making Competition

Club Activity :

"Math Escape Room: A Thrilling Test of Logic and Teamwork"

As part of its engaging club initiatives, ALGOVEDAS, the technical club of the AIML department at MIT Academy of Engineering, organized an exciting "Math Escape Room" event. The activity was designed to strengthen students' logical thinking, analytical reasoning, and teamwork through a series of challenging yet enjoyable mathematical puzzles.

Participants formed teams and worked against the clock to decode clues and solve problems within a set time limit. The event required students to apply mathematical concepts and strategic thinking in an interactive, game-based format, transforming traditional problem-solving into an adventurous learning experience.

The event created a dynamic and energetic environment where collaboration and critical thinking went hand in hand. It enhanced students' quantitative aptitude while encouraging peer learning and healthy competition.

The department extends its sincere appreciation to Prof. Deepti Bhirud, Faculty Coordinator of ALGOVEDAS, for her continuous guidance and support in organizing such innovative and intellectually stimulating activities for students.

Date : 22nd December 2025

CLUB ACTIVITY

"CODEWARS – COMPETITIVE CODING EVENT"

A competitive coding event CODEWARS was successfully organized on 23 January 2026 by AlgoVedas in association with ASTRAA at MIT Academy of Engineering, Alandi, Pune.

The event provided a platform for students to showcase their programming and problem-solving skills in a fast-paced competitive environment. Participants competed by solving challenging coding problems within a limited time, testing their logical thinking, accuracy, and speed.

The competition created an energetic and engaging atmosphere where students demonstrated innovation, determination, and technical excellence. The event encouraged participants to enhance their coding skills and gain practical problem-solving experience.

The program was conducted under the guidance of Faculty Coordinator Mrs. Deepti Bhirud (Chaudhari) and the support of Head of Department Dr. Diptee Chikmurge (Ghusse), whose mentorship contributed significantly to the success of the event .The winners were recognized for their outstanding performance, precision, and consistency in solving complex problems. The event was successfully organized by the AlgoVedas team in collaboration with ASTRAA.

CODEWARS proved to be a valuable learning experience for all participants and marked another step toward promoting technical excellence and innovation among students.

MIT AOE Strengthens Global Partnership with Western Norway University of Applied Sciences

Building Bridges for a Stronger, Global Tomorrow

MIT Academy of Engineering (MIT AOE) has strengthened its international academic and research collaboration with **Western Norway University of Applied Sciences (HVL), Faculty of Technology, Environmental and Social Sciences.**

The collaboration, initiated by **Mrs. Sonam Singh,** is formalized through a Memorandum of Understanding (MoU) on Academic and Research Collaboration, along with an **Exchange Agreement on Student and Staff Mobility.**

These agreements establish a framework for academic cooperation, research collaboration, and student and staff mobility, opening new avenues for international expsoure, knowledge exchange, and collaborative academic initiatives between the two institutions.

Department of CSE (AIML) Signs MoU with Puresoft Solution

Towards a Smarter Tomorrow

The Department of CSE (AIML), MIT Academy of Engineering, Alandi, Pune, strengthened its industry collaboration through the signing of an MoU with Puresoft Solution to promote internships, skill development, research collaboration, and AI capacity building opportunities for students and faculty.

On this occasion, Datta Adsule delivered an expert session on "Real-Time Case Studies and End-to-End Design of Agentic AI Projects for Student Mentorship." The session highlighted practical insights into Agentic AI project mentoring, architecture design, orchestration, deployment strategies, and industry-driven implementation approaches.

Mr. Datta Adsule has been actively associated with MITAOE since 2023 through BoS contributions, SIH mentoring, industry-oriented project guidance, and collaborative research initiatives.

"National-Level Hackathon – Kurukshetra 2025"

Atharva Kadam, a student of the AIML department at MIT Academy of Engineering, was part of the winning team Cyber Phantoms at the 24-Hour National Level Hackathon Kurukshetra 2025, organized by MIT Arts Commerce & Science College.

The team competed in the Cyber Security & Blockchain domain and secured the Winner position for their project on "Autonomous AI Threat Detection & Elimination."

Date : 24 August 2025

"Code Breakers Shine at Code Arena 3.0"

Students from the AIML department of MIT Academy of Engineering achieved notable success at Code Arena 3.0, organized by the Department of Computer Engineering in collaboration with the PCCOER CODECRAFT X ACM-W Student Chapter at Pimpri Chinchwad College of Engineering and Research. Team Code Breakers secured the position of 1st Runner-Up for their project titled "Jeevandoot." The team members included Nikhil Shirsathe, Anisha Godheshwar, and Mayuri Agrawal.

Date : 8th September 2025

"Brahmastra_1 Clinches Victory at SIH 2025"

Students of the AIML department at MIT Academy of Engineering secured first place at the Smart India Hackathon 2025, held at the Indian Institute of Management Lucknow (Noida Campus), for Problem Statement 25240 offered by the National Technical Research Organisation.

Team members Nikhil Shirsathe, Chinmay Ghag, Aditya Patil, Samarth Chaudhari, Mayuri Agrawal, and Anisha Ghodeswar developed a secure offline multilingual translation system by designing a complete OCR-to-translation pipeline.

Date : 8th-12th December 2025

"INDRADHANU INTERNATIONAL HACKATHON"

Piyush Jangade secured 1st Prize at the Indradhanu International Hackathon organized by the International Relations Cell PCCOE, Pune.

The achievement was accomplished under the guidance of Dr. Diptee Chikmurge (Ghusse), HoD – CSE (AIML). The department congratulates the student on this outstanding accomplishment

TechSprint
The Open Innovation Challenge 2026

"TECHSPRINT HACKATHON 2ND RUNNER UP"

Team Flash presented Civic Setu – Bridging the Gap in Verified Environmental Impact at the TechSprint Open Hackathon organized by Google Developer Groups On Campus at MIT Academy of Engineering.

The project uses Google Gemini and blockchain technology to enable verified environmental cleanups and transparent sustainability efforts. The team members Mansi Somani, Vivek Singh, Nikheel, and Swapnil Akhade, all department students, developed this innovative solution.

E-YANTRA

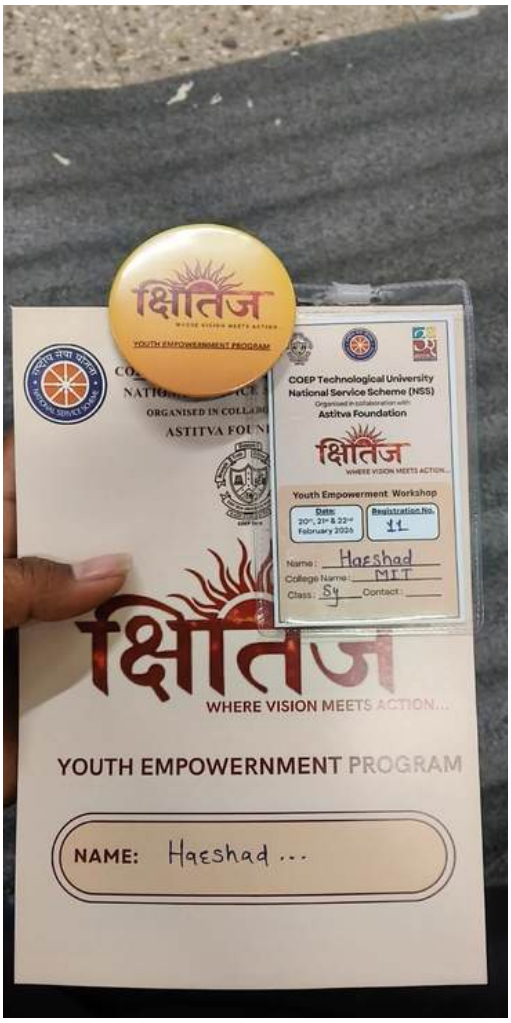

Team from MIT Academy of Engineering was recognized with the Technical Excellence Award for developing "A Scalable Grid-Based AI-IoT Precision Farming Platform." The project integrates Artificial Intelligence with the Internet of Things (AI-IoT) to create a smart farming solution capable of monitoring crops through sensor networks, collecting real-time environmental data, and enabling data-driven agricultural decisions. The scalable grid-based architecture allows the system to be deployed efficiently across farms of varying sizes, making it a practical solution for precision agriculture.

FIRST PRIZE AT HACKTOVATE, CODEFLIX'26

A team from MIT Academy of Engineering secured the First Prize in HACKTOVATE, an Open Innovation Competition held as part of CODEFLIX'26. The achievement showcased the team's innovation, creativity, and problem-solving skills.
Team Members:
Atulya Mishra,
Vivek Singh, Paritosh &Arjun
Achievement: First Prize
Competition: HACKTOVATE
Event: CODEFLIX'26

"MITAOE SHINES AT KSHITIJ – NSS TEAM SECURES TOP HONORS AT COEP"

We are proud to announce the outstanding achievement of our department students at Kshitij, hosted by College of Engineering Pune (COEP).

Academic Excellence in Sociosphere

Harshad and Kishor secured 1st Rank in Sociosphere (Presentation Competition), showcasing exceptional presentation skills, subject knowledge, and confidence. Their achievement reflects their dedication and strong academic foundation.

"RUNNER-UP AT WEB DESIGN COMPETITION – ITFEST 2K26"

Dhanashri Shah, a student from the Department of CSE (AI & ML), secured Runner-Up (Second Prize) in the Web Design Competition at ITFEST 2K26, organized by MIT Arts, Commerce & Science College (MIT ACSC) on 23 January 2026.

The competition required participants to recreate a given website template using HTML, CSS, and JavaScript without any external frameworks, while ensuring the design was fully responsive across different devices

"FIRODIYA KARANDAK 2K26 - WINNER"

The college drama team achieved a remarkable victory at Firodiya Karandak, one of the most prestigious intercollegiate theatre competitions in the Pune division. The event brings together numerous colleges that perform their plays and compete across various aspects such as acting, singing, music, stage art, sound design, and overall team coordination, making it a highly challenging and competitive platform.

Among the talented performers, Nahush Deshmukh from the AIML department was also a part of the winning team. This achievement highlights the creativity, dedication, and teamwork of the students and adds another proud moment to the college's cultural accomplishments.

Other Participations

"AVISHKAR COMPETITION Zonal Level

24-HRs Hackathons

Sport's Page

"Runner-Up Position in SPPU Chess"

Mansi Somani, a student of the AIML department at MIT Academy of Engineering, achieved the Runner-Up position in the Chess competition organized under Savitribai Phule Pune University (SPPU).Her accomplishment highlights her strategic thinking, concentration, and dedication beyond academics.

Date : 2nd November 2025

"Cricket Glories "

MITAOE vs believers cricket club piyush jangade delivers match winning spell in one day red ball match 7 overs 5 wickets for 19 runs

Himanshu Gharde (SY-AIML) has been selected for the SPPU Cricket Zonal Team Association Trials 2025–26. The selection was made after university matches in which 118 teams from the Pune district participated, from which only 15 players were shortlisted for the trials held at Trinity College of Engineering, Pune.

"AIML Volleyball Team"

The AIML department team of MIT Academy of Engineering secured 2nd place in the Inter-Department Volleyball Competition.

The team displayed strong coordination, sportsmanship, and teamwork throughout the event. Their performance reflects the department's active participation not only in academics and technical activities but also in sports.

Date : 8th November 2025

University Representation

Ashis Kumar Lenka represented the college in University-level Basketball Sport, demonstrating dedication, teamwork, and excellent sportsmanship.

Sarthak Rajurkar represented the college in University-level Badminton Sport, demonstrating dedication, teamwork, and excellent sportsmanship.

Piyush and Himanshu, representing the Cricket Team of MIT Academy of Engineering, played a key role in securing a victory in a recent cricket match.

As members of the official MITAOE Cricket Team, their performance reflected strong teamwork, dedication, and sportsmanship on the field. Their contribution added pride to the department and the institute.

HOD MESSAGE

It is a matter of great pride to present this newsletter of the Department of Computer Science & Engineering (Artificial Intelligence & Machine Learning). The department is guided by a clear vision to develop competent, ethical, and industry-ready AI professionals, and a mission to impart strong technical foundations, promote research and innovation, and nurture lifelong learning, in alignment with Outcome-Based Education and NEP 2020.

During this academic period, the department has made consistent efforts to translate its vision and mission into action through a student-centric and industry oriented ecosystem. Our students actively participated in technical workshops, hackathons, research activities, internships, and certification programs, which have significantly enhanced their technical competencies, problem-solving abilities, and career preparedness. These initiatives have resulted in commendable achievements in competitive events, internships, research publications, and innovative projects, thereby strengthening students' academic profiles and employability.

I sincerely appreciate the dedicated efforts of our students, faculty, and support staff in upholding the department's academic standards and professional culture. I am confident that our graduates will continue to excel in higher education, research, entrepreneurship, and the global AI industry, contributing positively to society and technological advancement. Best wishes for continued success and innovation.

Editor's Note

This newsletter reflects the collective efforts, achievements, and vibrant activities carried out throughout the academic period. It highlights the dedication of students, the guidance of faculty members, and the collaborative spirit that drives the department forward.

Through this edition, we aimed to capture important events, accomplishments, and initiatives that contribute to the growth of the academic community. We hope this newsletter serves as a meaningful record of the department's progress and inspires continued learning, innovation, and participation in the future.

We extend our sincere gratitude to everyone who contributed their time, efforts, and support in making this newsletter possible.
